DETAILS

A “One time” only opportunity to attend a “Combined Reams Levels I and II” seminar being offered at this time! In order to accommodate the varied requests we have received since announcing that Dr. Beddoe will now be personally offering Levels I, II, III and IV seminars in RBTI along with other services in his own curriculum we are utilizing this venue for all former and new students of Level I, as well as all those wishing to attend a Level II

Level I students prepare for **Level II** by having a working understanding in Biological Ionization principles based on the basics within the first ten chapters of Dr. Beddoe’s textbook *Biologic Ionization as Applied to Human Nutrition*. Seminar time is dedicated to helping the student learn and understand the basic meanings of the numbers both individually and collectively to acquire a working use of RBTI language. No time is spent in teaching the Urine and Saliva lab testing procedures until Level II. **Level II** brings the student to begin an integrative understanding of digestion and frequency utilizing the full urine and saliva lab test, as taught at this level, and to acquire the basics of tailor-making diet and supplement programs based on a more expanded and integrated understanding of the “numbers.” At the end of Level II the student will be given a take-home Open Book Challenge Test for completion upon entering Level III.

INSTRUCTOR:

As a dental physician since 1970, Dr. Alexander Beddoe, DDS, very early saw that “*drill, fill and bill,*” did not address the real cause of degenerative disease, so clearly demonstrated in the dentition of his patient’s. This motivated Dr. Beddoe on a search that resulted in him becoming a recognized author, lecturer, instructor and international authority on the Biological Ionization Theory through his association, (1975 —1985), with its developer, Dr. Carey Reams.

As a recognized authority and enthusiastic teacher and lecturer on Biological Ionization applications, Dr. Beddoe has over 25 years of clinical-nutrition practice experience using Biological Ionization as the exclusive method of ionic electrochemical evaluation of the human nutritional condition and needs.

Dr. Beddoe has authored the only textbooks on Biological Ionization, as it applies to both soil/plant chemistry and human chemistry, approved by Dr. Carey Reams. His texts are being used by several schools of natural medicine around

America as the definitive text for learning the theory and practice of Biological Ionization principles.

• **TELEVISION INTERVIEW COMING UP:
NOVEMBER 15TH LIVE FROM MIAMI, DR. BEDDOE WILL
BE INTERVIEWED ON DOCTOR'S NIGHT ON TBN!
